The superficial duality of the nature of human beings as bodies separate from souls, or hearts separate from minds, is caused by limitations in consciousness. Modern contemporary science is applying the Quantum Field Theory to transcend such perceived dualities and gain insight into Oneness. The Unity and Oneness of Creation has been perceived in super-consciousness states by Saints and Sages of all ages, in all religions and cultures. We are at a critical time where we must see the subtle oneness that unites

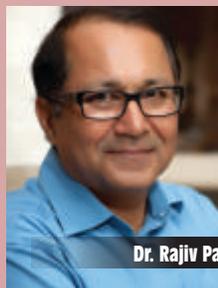

all of us in Divine love, harmony, and peace. For the last 40 years, the SSF-IIHHS has promoted the marriage of Science and Spirituality. This year's conference assembles over 60 pioneers, researchers, and leaders in Science and Spirit who will share experiences and discoveries, and clear the path towards greater awareness and a better tomorrow. Our mentor, Fr. John Rossner, continues to guide and inspire us from the Heavenly realm as we take the lead towards this exciting transformation into a golden new humanity!

- **Freddy Silva: "The Lost Art of Resurrection"** (Lecture: 1 ½ hrs)
"Those who say they will die first and then rise are in error," states the once banned gnostic Gospel of Philip. Long before Jesus, initiates from Egypt and China to Greece and North America practiced a secret mystical ritual, and regarded the experience as the pinnacle of spiritual development, a life-altering awakening that disclosed insights into the nature of reality and the self. As recently discovered beneath an Egyptian pyramid, the experience of resurrection was meant for the living. Such initiates were described as "risen from the dead." So, what is living resurrection? What were magi like Jesus and Zoroaster really trying to convey? Why did initiates guard its secrets with their lives? Which temples were used for initiation? And why would the Church prefer you didn't know about all this?
- **Lilly Rahmann, PhD: "Quantum Medicine and the Human Vibration"** (Lecture: 1 hr)
Balance the emotions, reduce pain, and boost the body's energy through Quantum Medicine. This live demonstration shows how easy and effective these healing techniques are. Everyone can learn how to reduce pain for themselves and their loved ones.

- **Judy Bachrach: "Surviving Death: How the Spirit Continues"** (Lecture: 1 hr)
What happens when we die? Thanks to CPR and other current forms of resuscitation, a growing number of the formerly dead are now among us — many of them with vivid, lucid, and detailed memories of consciousness after death. Judy Bachrach discusses her recently published book, *Glimpsing Heaven*, a scientific and spiritual examination of the survival of the spirit beyond death. (Follow-up workshop: CW-S4b)
- **Anadi Martel: "The Power of Light: The Latest on the Use of Light for Healing Body and Mind"** (Lecture: 1 hr)
The unique power of Light resides in its dual reality: it is both very material, having profound effects on our physical world, and also intimately related to the dimensions of spirit and transcendence. Explore current research on light for medical and psychotherapeutic applications, as well as future ones. (Follow-up workshop: CW-S13b)
- **Raymond Moody, MD, PhD: "Frontiers of the Afterlife: What Near-Death Experiences Mean for the World"** (Lecture: 1 hr)
Can the messages of love that people with NDE's bring back from the other side bind humanity together? Can NDEs serve as reference points for bringing contending theologies of the afterlife into harmony? Dr. Moody draws on more than fifty years of investigation into transformative spiritual experiences, and explains where the world is with after-death research.

Goswami

Hogan

- **Amit Goswami, PhD: "Quantum Physics' Guide to Creativity and Personal Growth" — Part 1 of 2** (Lecture: 1 hr)
Quantum physicist Amit Goswami uses recent advances in understanding of quantum physics and consciousness to elucidate the nature of creativity and guide us in pursuit of personal growth. In his view, all objects of our experience begin as quantum possibilities from which consciousness might choose. The question of creative living then becomes how best to make choices. It involves the creative process, which Goswami explains and teaches. Overcome the barriers to creative choice, and align yourself with the evolutionary movement of consciousness. (Continued in CW-S3a)
- **R. Craig Hogan, PhD: "Afterlife Communication: The Key to World Peace"** (Lecture: 1 hr)
World peace isn't simply having a world without wars and conflict. A peaceful world is a world in which every person lives without fear of war, domestic violence, theft, violation of person, starvation, ill health, and death. Only changes in deep-seated motivations and viewpoints will allow people to live in love, without fear, caring more for others than acquiring for themselves, so they live in peace. The hallmark of near-death experiences and afterlife communications is that experiencers become more altruistic, less materialistic, more loving, and not fearful of death. If societies invested more in finding new afterlife communication methods, refining existing methods, and helping people communicate with loved ones in the afterlife, masses of people would be changed, societies would be changed, and nations would be changed. We would have world peace. (Follow-up workshop: CW-S2b)

Ywahoo

Karim

Valiquette
Habib

- **Venerable Dhyani Ywahoo: "An Experiential Tour of Our Heart Relationship with the Field of Joyful Awareness"** (Lecture: 1 hr)
We are gardeners and the universe we live in is nurtured by sweet waters of gratitude. This moment is the garden in which tomorrow and yesterday are revealed. We give appreciation and sunlight of generosity quickens the seed of one's intention to accomplish. The accomplishments may be particular tasks within a particular time period that as seeds planted, flourish and be brought to harvest. When we think about planting seeds we understand the garden is swept clear of weeds. The ground is nurtured when we examine the nature of our heart-mind, and the seed of wisdom within reveals we are never separated from the light from which all appearances arise. (Continued in CW-S1b)
- **Doreya Karim: "An Introduction to the Egyptian Science of BioGeometry and BioSignatures"** (Lecture: 1 hr)
BioGeometry uses the subtle energy effects of geometric form, colour, angle, etc., to introduce natural balance on all levels of being. The result is a powerful, interactive way of creating harmony in living things and spaces. BioSignatures, a special branch of BioGeometry, are precisely constructed linear diagrams that have the same geometric configurations as specific vital energy patterns within the organs in the body. When placed within the peripheral human energy field, a resonant connection occurs, harmonizing the corresponding energy function within the internal organ.
- **Fujiaolian Shadia Habib & Sifu Julien Valiquette: "Traditional Chinese Internal Healing Arts"** (Lecture: 1 ½ hrs)
The body's innate ability to heal itself can be restored through the ancient Chinese art and energy medicine of Qi Gong. By cultivating Qi (*The Universal Life Force*), increasing activity in the body's energy centres, releasing energy blocks, and balancing the yin and yang elements and forces, healing occurs through Qi Gong & Tai Chi.

- **P.M.H. Atwater, LHD, PhD: "Glimpses of Beyond"** (Lecture: 1 ½ hrs)
This presentation is based on P.M.H. Atwater's research and new book, *Dying to Know You: Proof of God in the Near-Death Experience*. Participants will share in the experiences of adults and children from six countries. Dr. Atwater has spent nearly four decades listening and documenting what nearly 4,000 child and adult experiencers of near-death states shared — what they saw, heard, felt, and suddenly, absolutely knew. It is nothing less than what everyone on the planet seeks to have: proof that God exists — beyond description, as a Source, an all-encompassing Oneness.

Dali's Greatest Secret, chronicles surrealist Salvador Dali's deep fear of death and how his painting of a vision at Fatima, Portugal quelled his fear. This untold story answers many of the mysteries in his work and personal life. The painting was hidden for 30 years beneath a nun's bed, not to be found until 2005. The film was nominated at the Madrid International Film Festival for Best Director and Best Documentary Film. A discussion on the spiritual questions presented in the film will follow the presentation.

• **Fadel Behman, PhD: "Harmony and Resonance in the New Humanity"** (Plenary Session: 1 ½ hrs)

The new humanity seeks a new life that understands and embraces the rich multi-dimensionality of inner and outer life. This new life could be achieved by finding the harmony and resonance between the four avenues of human perception and experience: Spirit, Body, Heart, and Mind. Both Science and Spirituality are essential for the new humanity to fulfill human potential. The most recent scientific discovery came from particle physics research, in July 2012, that confirms the Higgs-Particle, also called the God-Particle, created in the Higgs-Field, or what is known as the Vacuum or Space or Quantum-Field that fills the cosmos. Modern Spirituality calls this Quantum-Field the Omnipresence of the Divine Oneness — the source of the implicit Connections of All That Is. The Spirit is the Divine Spark that animates and gives life to the Body, Heart, and Mind. For the whole person, they perform simultaneously and coherently together for the good of the new human and relationship with the All.
