## Introduction to Mantra Meditation

with Rev. Daniel Richard

A mantra is a combination of syllables that builds up energy. Each mantra activates its specific energy, which can help us remove obstacles and achieve our life goals (spiritual, family, career, social standing).

Learn how to practice mantras, and start a meditation practice with a mantra of your choice.

We will review the theory behind the practice of mantras. We will practice 8 to 12 short mantras with the intent to feel the energy and select a mantra to practice.

## Altered States of Consciousness and Healing therapies

with Rev. Raul Valverde, PhD

Altered states of consciousness cover transpersonal experiences that involve an expansion of consciousness beyond the limits of time and space. Altered states of consciousness allow us to answer the questions of who we really are and why we are here. Special emphasis will be given to Holotropic therapy.

Holotropic therapy has been practiced by psychologists as a way to produce an altered state of consciousness without drugs, it is a simple yet powerful technique based on combined insights from modern consciousness research, depth psychology and perennial spiritual practices and activates non-ordinary states of consciousness which mobilize the spontaneous healing potential of the psyche.

## Meditation with Mandalas by Kaizen Tree

### WHO ARE WE?

My name is Rommel. I used to be a member of your center along with my wife Angela (who is still a member). I've always been interested in new meditation practices, and through my search, I found the sand mandala. Since the tools for making one were not readily available here in Canada, I decided to make my own. I found that this practice helped me become more mindful and a lot more focused. Today, I find myself wanting to share the benefits of this practice with other people.

### HOW WILL THE WORKSHOP WORK?

The workshop will take about 120 minutes. We will provide all the materials necessary for those taking part in it. The goal is to introduce people to yet another way of meditating, another practice, another culture. We believe people will find it both instructional and engaging.

Finally, we'll fold the paper, rub the paints out and read the butterfly within.

## Healing with AKASHA

### Quantum Energy

with Rev. Raul Valverde, PhD

**Saturday, April 18<sup>th</sup>, 2020**

1:00 p.m. to 4:00 p.m.

String theory explains how all the particles, and all the forms of energy in the universe could be constructed by hypothetical one-dimensional strings. These "strings" vibrate in multiple dimensions, and depending on how they vibrate, they might be seen in 3-dimensional space as matter, light, or gravity. It is the vibration of the string which determines whether it appears to be matter or energy, and every form of matter or energy is the result of the vibration of strings.

AKASHA, synonym of source, it is of an energy that manifests itself as a substance and is the work of beings of a very high vibration that come from the source of the primary energy that is what gives rise to existence. It is the source of the eternal transforming manifestation of DNA, this quantum string energy is in everything that is organic that gives rise to all life forms.

The workshop details the origin of this wonderful healing energy and how to have access to it and its use to heal different deceases.

Not only is the Earth hollow, it is inhabited by advanced civilizations. Mount Shasta is the home of the present-day Lemurians, survivors of the sinking continent of Lemuria over 12,000 years ago.

Yes, our Lemurian brothers and sisters are real; they are well and physically alive, living in the subterranean city of Telos, underneath sacred Mt. Shasta.

They are 5<sup>th</sup> dimensional beings, and as the planet shifts

# 20/20 Visions of Tomorrow

Now in its 45<sup>th</sup> iteration, the SSF-IIHHS International Conference once again brings together pioneers at the frontiers of scientific, religious, and cultural discovery.

Recent consciousness studies suggest new, integrative models for a better understanding of humanity's place in a multidimensional and psychoenergetic universe. We must overcome artificial conceptual barriers that Western civilization has created, between intuition and reason, mind and body, and religion and science, by working together towards the creation of a more humane model for transcultural education and advanced research, in order to reignite our highest aspirations for recognition and agreement on shared human values. New paradigms in "future sciences" may enable us to achieve international peace and understanding in the years ahead.

Experience leading scholars, scientists, spiritual leaders, and gifted visionaries from cultures East & West, as they come together in Montreal for ten days, to share their insights and inspirations. We look forward to welcoming you. Pre-register now for the best value!
